PRODUCT PROMISE

The Seral and Savu lumbar packs are perfect for the mountain biking minimalist. Supremely stable for laps on local singletrack or gravel trails, this off-the-back hydration solution provides carry for a few key essentials and water. The Seral Series includes a lumbar reservoir while the Savu Series offers water bottle(s) carry.

Centimeters	19h x 32w x 11.5d cm.

INCLUDED

Reservoir 1.5L

* Pack weight does not include reservoir

SERAL FEATURE DETAILS

RESERVOIR SLEEVE

The dedicated internal reservoir sleeve is compatible with the Hydraulics 1.5L lumbar reservoir.

1. Insert reservoir into sleeve and use the internal hanging loop with buckle to ensure proper vertical orientation and stability.
2. Hose exits from the side of the main compartment zippered access point.
3. Wrap hose around the front of the body, from right to left, and attach hose to the magnetic bite valve attachment point.

For more information on reservoir care, visit osprey.com.

RESERVOIR BITE VALVE MAGNET

The reservoir bite valve magnet's placement can be adjusted by moving its placement along the left hipbelt webbing daisy chain.

RESERVOIR HOSE ADJUSTMENTS:

ADJUST HOSE LENGTH

1. Put on pack and determine appropriate tube length — measure twice and mark location to cut hose.
2. Slide the magnet away from the bite valve to a point below where the cut will be made.
3. Hold the bite valve in one hand and the tube in the other and pull firmly to remove.
4. Cut the tubing at the marked point and reinstall the bite valve (twist and push to insert), making sure the magnet is still on the tubing.

SAVU FEATURE DETAILS

DUAL TUCKAWAY WATER BOTTLE SLEEVES

The dual tuckaway water bottle sleeves are designed to carry two, one or no water bottles. The structured sleeve allows for easy access to slide water bottles in and out while riding. To engage water bottle sleeve:

1. Locate the water bottle icon on each side of the pack and loosen the dual compression straps.
2. Slide the structured sleeve out from behind the hipbelt pocket and engage the top and bottom snap of each sleeve.
3. Place water bottle into sleeve and secure and cinch bungee for additional stability.

TO DISENGAGE WATER BOTTLE SLEEVE:

1. Remove water bottle.
2. Unsnap sleeve and slide behind hipbelt pocket.
3. Tighten the dual compression straps to maintain stability and keep the pack close to body.

SUSPENSION/CARRY

AIRSCAPE™ LUMBAR BACKPANEL

- + Extra thick ridged foam with center air channel for excellent ventilation

HIPBELT

1. Breathable airmesh wrap hipbelt contours over the hipbone to provide a comfortable, secure and stable carry
2. ErgoPull waiststrap closure system allows for proper snug and stable fit
3. Side compression straps pulls the load close to body and into the lumbar
